

OVERVIEW

# ENCRYPTION SOLUTIONS

Data protection for businesses of all sizes

Progress. Protected.

# Encrypting data on your endpoints can help you comply with data protection regulations

## **SATISFY LEGAL DATA PROTECTION REGULATIONS**

By securely encrypting the personal data records you hold, your business or organization can better protect itself in the event of a system breach. That's because such incidents are much less likely to be considered a compliance failure by regulatory authorities if data is properly encrypted.

## **MONITOR ENCRYPTION ON USER MACHINES REMOTELY**

Remote management simplifies admin duties and saves time. Go beyond management of security products and manage ESET Full Disk Encryption using the ESET PROTECT console. ESET PROTECT can be installed on-premises or run as a cloud console.

## **PROTECT DATA WITH A SIMPLE YET POWERFUL SOLUTION**

With ESET encryption solutions you can safely encrypt hard drives, removable media, individual files and email. The solution leverages AES-NI to provide robust, hardware-accelerated AES 256 encryption, ensuring fast and efficient encryption and decryption with minimal impact on system performance—all with minimum input from the user.

### **ROBUST AND RAPID DATA PROTECTION FOR BUSINESSES OF ALL SIZES**

#### **eSet<sup>®</sup> FULL DISK ENCRYPTION**

Manage full disk encryption across your entire network from a cloud or on-premises console—alongside other ESET security products. ESET PROTECT console allows admins to deploy, activate and manage encryption on their connected endpoints with a single click. Full Disk Encryption (FDE) encrypts system disks, partitions and entire drives to ensure that everything stored on each workstation is locked down and secure, protecting you against loss or theft.

#### **eSet<sup>®</sup> ENDPOINT ENCRYPTION**

Provides additional protection. Users can protect individual items like files, folders, removable media and email. With file and email encryption, user data is protected when data is in transit, allowing secure collaboration. You can also manage remote devices via a proxy, eliminating the need for risky incoming connections and making management of encryption safe and simple for businesses of all sizes.

# Which ESET encryption solution is best for you?

## WHEN TO USE ESET FULL DISK ENCRYPTION

**All products managed from one console.** IT admins deal with remote management on a daily basis. ESET Full Disk Encryption works within the ESET PROTECT console, helping administrators to save time thanks to familiarity with the existing management environment and concepts.

**The essential encryption solution to achieve legal compliance.** ESET Full Disk Encryption not only protects your company from data loss but also helps it comply with data protection regulations such as GDPR. This solution offers a simple and straightforward way to remotely encrypt data at rest on each end-user's device.

**Cross-platform coverage.** Manage encryption on Windows machines and native macOS encryption (FileVault) from a single dashboard.

## WHEN TO USE ESET ENDPOINT ENCRYPTION

**Granular data protection.** All companies have sensitive data such as customer lists, proprietary information and sales-related data. ESET Endpoint Encryption gives companies enhanced ability to protect specific **files, folders, virtual disks or archives**. Ideal for organizations with a shared devices policy and advanced encryption requirements.

**Protect data in transit.** ESET Endpoint Encryption goes beyond protecting data stored on company machines. By encrypting emails and attachments and restricting access to removable media for specific users, it can also **protect data in transit** and prevent leaks outside the company network.

## FEATURES

- ✓ Full disk encryption
- ✓ Manage encryption on Windows
- ✓ Manage encryption on macOS
- ✓ Removable media encryption
- ✓ File and folder encryption
- ✓ Outlook plugin for email and attachments
- ✓ Virtual disks and encrypted archives
- ✓ Licensing
- ✓ Purchase options
- ✓ Available via MSP monthly licensing

# This is ESET

## Proactive defense. Minimize risks with prevention.

Stay one step ahead of known and emerging cyber threats—targeted attacks, zero-day threats, ransomware, phishing, and more—with our AI-Native, prevention-first approach. ESET combines the power of AI and human expertise to deliver easy and effective protection.

Experience best-in-class, science-driven security, backed by over 30 years of in-house global cyber threat intelligence. Our extensive R&D network, led by industry-acclaimed researchers, powers our award-winning, cloud-first cybersecurity platform. ESET solutions are highly

customizable, include local support, and have minimal impact on performance.

ESET protects your business so you can unlock the full potential of technology.
